PIFC

Advantages and Challenges

Zagreb, 27 February 2004

Robert de KONING

European Commission

DG BUDGET – B.3

1. PIFC: Introduction

• 1. What is Public Internal Financial Control (PIFC)?

• 2. What are the advantages and challenges of PIFC?

2. PIFC is a coherent system

- 1. Managerial Accountability (Financial Management and Control Systems FMC)
- 2. Independent Internal Audit (IA)
- 3. Central Harmonisation Unit (CHU)

• Or: PIFC = FMC + IA + CHU

3. PIFC: Managerial Accountability

- Financial Management and Control systems (FMC): subject to internal audit
- Separation of duties (3-tier)
- Develop FMC manuals (audit trail)
- Develop objective risk management tools
- Accounting, archiving, accessibility
- Ex ante financial control, ex post financial control (inspection), project monitoring, corrective actions, follow up audit recommendations

4. PIFC: Independent Internal Audit

- Based on international standards and best practice
- Assesses FMC-systems
- Adds value to management
- Functionally independent from management

5. PIFC: Central Harmonisation Unit(s)

- Harmonisation and co-ordination
- Promotion and motivation of best practice
- On-the-spot verification
- Networking and publications
- Co-ordinating sustainable training facilities
- Annual PIFC Report

6. Inspection/Revision versus Internal Audit

Inspection is not internal audit, but includes:

- Third party complaint investigation
- Focus on (questionable) transactions and budget rule violations
- Punishing human errors
- Ex post financial control (monitoring)

7. Internal Auditor

- Assesses FMC-systems on economy, efficiency and effectiveness
- Provides reports and recommendations to management
- Does not mix with inspection (management) activities but remains always independent
- Does not take responsibility for implementing improvements in FMC-systems

8. PIFC in 6 practical steps

- 1. Conceptualisation phase involves ALL relevant stakeholders
- 2. PIFC Strategy Paper
- 3. PIFC Legislation
- 4. PIFC Set-up of institutions
- 5. PIFC Implementation
- 6. Continuous training for controllers/auditors

9. PIFC: Challenges and Prerequisites

- Unequivocal commitment by Ministry of Finance and the Government
- Transparency and good Public Relations by the Ministry of Finance
- Timely establishment of a CHU with a highly independent Director
- Experienced and motivated staff in key positions
- Sustainable training facility

10. PIFC: benefits and expectations

- Sound financial management of the public sector
- A win-win situation for all stakeholders: tax payers, public sector, final beneficiaries, Ministry of Finance, line ministries, StateAudit Office, Parliament: democracy
- Timeframe When will a new PIFC system work adequately?
